FULL STACK SOFTWARE DEVELOPER

Recent graduate of Ada Developers Academy full stack software engineering boot camp with an interest in continuous learning and optimization. Transitioning to software development after 4+ years of study in computer science and development. Bringing leadership, communication, creativity, and versatility honed through 7+ years of teaching and over 9 years of collaborating in fast-paced, customer-focused retail and marketing environments.

SKILLS

- **Languages:** Python, Java, C++, JavaScript, HTML, CSS, PHP
- **Frameworks & Libraries:** Flask, Django, React, Node, Spring Boot, WordPress
- **Tools:** Git, SQLAlchemy, PostgreSQL, MongoDB
- **Testing:** Pytest, JUnit, Jest
- **Cloud Technologies:** Heroku, GCP, AWS, OpenShift
- **Development Environments:** VSCode, IntelliJ, PyCharm, Eclipse, Xcode

TECHNICAL PROJECTS

Ada Developers Academy CMS – [Website](#)

CMS site for non-profit coding bootcamp built on WordPress with PHP and CSS

- Collaborated on migration to a new WordPress implementation to consolidate theme customization and improve site maintainability
- Incorporated Agile principles using a Kanban approach to task management, accountability, and communication, and pair-programming to ensure consistency for the 2-member developer team
- Improved SEO performance and streamlined the editing workflow for an administrative staff of 20+

Limn – [Github](#)

Django social media journal app integrating APIs including Spotify, LocationIQ, and Cloudinary

- Collaborated on a 2-person team throughout the development lifecycle, from determining requirements, wireframes, database design, and testing to implementation and debugging with Django, Pytest, and PostgreSQL and deployment with Heroku
- Enhanced multimedia journal entries with calls to 5+ external APIs for attachment of images, videos, single tracks and playlists, location mapping, calendars, and data visualizations

Inspiration Board – [Github](#)

Message board app using API calls between React and the Flask and PostgreSQL backend

- Developed in coordination with a 5-member development team, according to provided specifications using Kanban techniques for communication and Git version control and code reviews
- Connected Flask CRUD API functionality with React frontend allowing users to create, view, and like brief inspirational messages using React components; tested with Pytest and Jest

Event Calendar

Event planning calendar built with a Java backend and Swing GUI

- Built according to provided CRUD specifications for organizing and managing event data within a calendar; tested with JUnit
- Designed Swing GUI for an intuitive user experience across 12+ user operations
